

VISHAL CHAUHAN

Lead Product Designer | Design Manager | Product Strategy | Design Systems | Human-Centered AI

Pune, India | +91 8088 893 700 | vishalchauhanux@gmail.com | linkedin.com/in/vishname18 | vishalfolio.lovable.app

PROFESSIONAL SUMMARY

Lead Product Designer and Design Manager with 16+ years across enterprise SaaS and complex B2B products. Managed design teams of 6 at Hilti and 7 at Coforge, and guided 50+ designers across 40+ HCL Software products through design-system reviews and governance. I work across product strategy, customer research, web and mobile design, people management, and AI-assisted design practice while keeping product decisions with the team.

CORE COMPETENCIES

Product: Product Strategy, Product Vision, Product Discovery, Enterprise SaaS, Systems Thinking, Roadmapping, Service Design, Decision Support

Experience: Enterprise UX, Human-Centered Design, Human Factors, UX Research, Information Architecture, Interaction Design, Workflow Design, Accessibility, Cognitive Load Reduction, Usability Testing

Leadership: People Management, Distributed Team Leadership, Performance Reviews & 1:1s, Cross-Functional Design Leadership, Executive Communication, Mentorship, Hiring & Interview Design, Design Governance, Design Operations (DesignOps), Stakeholder Alignment

Technology & AI: Figma, FigJam, Miro, Storybook Collaboration, HTML, CSS, JavaScript, React, Angular, Design QA, AI-Assisted Research, AI-Assisted Synthesis, Human-in-the-Loop Evaluation, ChatGPT, Claude, Copilot

PROFESSIONAL EXPERIENCE

HILTI GROUP

March 2023 - Present

Lead Product Designer

Product Strategy | Business Impact & Growth | People Management | Human-Centered AI

- Lead product design for ON!Track, Hilti's enterprise asset-management product across web and mobile.
- Defined the Vision 2030 North Star for ON!Track, aligning customer needs, product direction, and leadership around a multi-year CHF300M business ambition.
- Conducted and used findings from 100+ customer interviews, field visits, and research sessions across Europe and North America to shape Storage Assets, Alerts, Van Driver Journal, and longer-term priorities.
- Worked with the product team to validate a proposed Service Checklist; research found a stronger need for Van Driver Journal and helped realign the work around customer value.
- Managed 6 direct reports in the HR system, including one-to-ones, performance reviews, feedback, and growth planning.
- Prioritized 25 research-backed issues for the Storage Assets New Look by effort and customer impact, then organized the work into release phases.
- Introduced AI into research synthesis, exploration, UX writing, and evaluation, reducing repetitive work while keeping product choices with the team.
- Contributed to ON!Track's 18% ARR growth, from CHF72M to CHF85M, through the New Look initiative and related workflow improvements.

HCL SOFTWARE

November 2018 - March 2023

Lead Designer I

Enterprise Product Design | Design Systems at Scale | UX Centre of Excellence | Design Governance

- Led product design for HCL Link, an enterprise data-transformation and integration product, and worked across related IBM App Connect Enterprise (ACE) and IBM Transformation Extender (ITX) offerings.
- Designed Auto Mapping to identify compatible source and target data structures, reducing manual work for developers and integration specialists.
- Led the HCL Software design system across more than 40 enterprise products, connecting Figma standards and Storybook references with React and Angular implementation.
- Guided and mentored more than 50 cross-product designers through design reviews, shared practices, and UX Centre of Excellence support.
- Set up shared component, typography, spacing, and interaction standards and supported adoption through design reviews and close work with engineering teams.
- Built hiring rubrics, interview exercises, mentoring practices, and review methods through the UX Centre of Excellence.
- Helped product teams use a shared design language without removing the flexibility needed by different technical products.

COFORGE (FORMERLY SYNERZIP)

July 2016 - November 2018

Lead UX Designer

People Management | Practice Growth | Presales | Client Workshops

- Helped grow the design practice from 2 to 20+ designers through hiring, onboarding, mentoring, and clearer ways of working.
- Directly managed 7 designers and supported their project work, feedback, and development.
- Used design sprints in the presales cycle to turn small requests into on-site client workshops. Follow-on engagements expanded from 4-8 weeks to 12+ weeks with twice the design staffing, equivalent to an estimated 3-6x increase in design resource-weeks.

EARLY CAREER (SEPTEMBER 2010 - JUNE 2016)

DataCore Software | Associate UX Architect | February 2013 - June 2016 - Designed enterprise storage and infrastructure products for technical administrators.

Webenza | UX Designer, Consulting | November 2011 - January 2013 - Built the agency identity and delivered client work, including Midnight Marathon and Inventure Academy, alongside the primary Thomson Reuters role.

Thomson Reuters (FindLaw) | Associate Web Developer | April 2011 - March 2012 - Designed, coded, reviewed, and published attorney-website updates using HTML and CSS.

The Akshaya Patra Foundation | UI Designer | September 2010 - April 2011 - Created print, digital, and early web communication, building foundations in visual design, HTML, and CSS.
